

Whereas luminaries in the conservation movement, such as scientist Aldo Leopold, forester Bob Marshall, writer Howard Zahniser, teacher Sigurd Olson, biologists Olaus, Margaret (Mardy), and Adolph Murie, conservation leader Celia Hunter, and conservationist David Brower believed that the people of the United States could have the boldness to project into the eternity of the future some of the wilderness that has come from the eternity of the past;

Whereas Senator Hubert H. Humphrey, a Democrat from Minnesota, and Representative John Saylor, a Republican from Pennsylvania, originally introduced the legislation with strong bipartisan support in both bodies of Congress;

Whereas with the help of their colleagues, including cosponsors Gaylord Nelson, William Proxmire, Clinton P. Anderson, and Henry "Scoop" M. Jackson, and other conservation allies, including Secretary of the Interior Stewart L. Udall and Representative Morris K. Udall, Senator Humphrey and Representative Saylor toiled 8 years to secure nearly unanimous passage of the legislation, 78 to 8 in the Senate, and 373 to 1 in the House of Representatives;

Whereas critical support in the Senate for the Wilderness Act came from 3 Senators who still serve in the Senate as of 2004: Senator Robert C. Byrd, Senator Daniel Inouye, and Senator Edward M. Kennedy;

Whereas President John F. Kennedy, who came into office in 1961 with enactment of wilderness legislation part of his administration's agenda, was assassinated before he could sign a bill into law;

Whereas 4 wilderness champions, Aldo Leopold, Olaus Murie, Bob Marshall, and Howard Zahniser, sadly, also passed away before seeing the fruits of their labors ratified by Congress and sent to the President;

Whereas President Lyndon B. Johnson signed into law the Wilderness Act in the Rose Garden on September 3, 1964, establishing a system of wilderness heritage as President Kennedy and the conservation community had so ardently envisioned and eloquently articulated;

Whereas now, as a consequence of wide popular support, the people of the United States have a system of places wild and free for the permanent good of the whole people of this great Nation;

Whereas over the past 40 years the system for protecting an enduring resource of wilderness has been built upon by subsequent Presidents, successive leaders of Congress, and experts in the land managing agencies within the Departments of the Interior and Agriculture;

Whereas today that system is 10 times larger than when first established;

Whereas the Wilderness Act instituted an unambiguous national policy to recognize the natural heritage of the United States as a resource of value and to protect that wilderness for future generations to use and enjoy as previous and current generations have had the opportunity to do;

Whereas since 1964, when the first 9,000,000 acres of wilderness were included by Congress, more than 110 additional laws have been passed to build the National Wilderness Preservation System to its current size of 106,000,000 acres;

Whereas wild places protected in perpetuity can currently be found and enjoyed in 44 of the Nation's 50 States;

Whereas this wealth of the heritage of the United States can be seen today from Alaska to Florida in over 650 units, from Fire Island in New York's Long Island South Shore and Ohio's West Sister Island in Lake Erie, to far larger Mojave in eastern California and Idaho's River of No Return;

Whereas President Gerald R. Ford stated that the National Wilderness Preservation System "serves a basic need of all Americans, even those who may never visit a wilderness area—the preservation of a vital element of our natural heritage" and that, "wilderness preservation ensures that a central facet of our Nation can still be realized, not just remembered"; and

Whereas President Gerald R. Ford has joined with President Jimmy Carter and more than 100 other prominent United States citizens as honored members of Americans for Wilderness, a committee formed to celebrate this national achievement: Now, therefore, be it

Whereas the legacy of the Atomic Energy Act of 1954, with 103 operating nuclear power plants in the United States providing 20 percent of the electricity supply of the United States, is invaluable in providing clean, emission-free, reliable power to the United States: Now, therefore, be it
